LinkedIn: <https://www.linkedin.com/in/sadhana-singh107/>

GitHub: <https://github.com/Sadhana107>

PROFESSIONAL SUMMARY

EDC–IIT Delhi & IIP Certified AI & Data Science enthusiast with hands-on exposure to Python, SQL, Machine Learning, Data Analysis, Dashboard Development, and AI-enabled software solutions. Worked on 20+ industry-oriented projects involving predictive analytics, automation, visualization, cybersecurity analytics, and data-driven problem solving. Strong understanding of frontend technologies, APIs, databases, and business-oriented technical solutions with internship exposure in software development and collaborative engineering environments.

EDUCATION

A.J. Institute of Engineering and Technology

B.E. in Artificial Intelligence & Data Science

CGPA: 8.03

Govt. PU College for Girls, Balmatta

Class XII – 81%

B.M. High School, Ullal

Class X – 94%

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript

Web & Software Development: HTML, CSS, React.js, Node.js, Flask, APIs

Data Science & Analytics: Machine Learning, Data Analysis, Predictive Modeling, Feature Engineering, EDA

Visualization & Reporting: Power BI, Tableau, Microsoft Excel

Database Technologies: SQL, MongoDB

Libraries & Tools: Pandas, NumPy, Matplotlib, GitHub, VS Code

PROFESSIONAL COURSES & CERTIFICATIONS

- Certified in Data Science — worked on Retail Forecasting and Employee Performance Analytics projects using Python, Power BI, and SQL
- EDC–IIT Delhi Certified in Generative AI & AI Tools — learned prompt engineering, AI-assisted productivity tools, intelligent automation, and AI-enabled content/data workflows
- Certified in Machine Learning — understood predictive systems including Student Performance Prediction and Sentiment Analysis models
- Certified in Python Programming & AI Tools — developed automation-based and AI-enabled analytical solutions using Python libraries
- Certified in Data Structures & Algorithms (DSA) — implemented scheduling optimization and logic-building projects
- Certified in Dashboard Development & Data Visualization — created business reporting and analytics dashboards using Power BI and Excel
- EDC–IIT Delhi Certified in Tableau for Data Visualization — understood storytelling dashboards, trend analysis, and reporting visualization concepts
- Postman Classroom Program — NITK Surathkal in collaboration with Postman (Dec 2024)

INTERNSHIP EXPERIENCE

Front-End Web Development Intern

Edunet Foundation in collaboration with AICTE & IBM SkillsBuild

Aug 2025 – Sept 2025

- Worked on responsive frontend development using HTML, CSS, and JavaScript
- Assisted in designing user-friendly web interfaces and UI components
- Participated in collaborative development workflows and project presentations
- Gained practical exposure to modern web technologies and GitHub-based project handling

Artificial Intelligence Intern

EDC–IIT Delhi & IIP

- Worked on AI-enabled automation and predictive analytics projects using Python and AI tools
- Assisted in developing intelligent solutions for business-oriented problem solving and research-based applications
- Participated in AI workflow optimization, data analysis, and technical documentation activities
- Gained exposure to AI-assisted decision-making systems and analytical reporting concepts

Data Science Intern

EDC–IIT Delhi & IIP

- Worked on data analysis, dashboard development, and predictive modeling projects using Python, SQL, and Power BI
- Assisted in handling structured datasets, data cleaning, visualization, and reporting workflows

- Participated in analytics-driven business case studies and ML-based prediction systems
- Gained practical exposure to EDA, feature engineering, and data-driven insights generation

Python Development Intern

EDC-IIT Delhi & IIP

- Worked on Python-based automation, backend logic, and API integration concepts
- Assisted in developing analytical applications and software workflow optimization projects
- Participated in debugging, scripting, and database connectivity tasks using Python and SQL
- Gained understanding of Flask-based application workflows and software development practices

Machine Learning Intern

EDC-IIT Delhi & IIP

- Worked on machine learning concepts including classification, prediction, and model evaluation techniques
- Assisted in building ML-based analytical solutions using Python libraries and structured datasets
- Participated in predictive maintenance, sentiment analysis, and forecasting-oriented projects
- Gained practical exposure to feature engineering, training workflows, and AI-enabled prediction systems

PROJECTS

1.HomeScope AI – House Price Prediction Platform

Tech Stack: Python, Streamlit, Machine Learning, Pandas, Scikit-learn, Power BI

- Built an AI-powered house price prediction platform using machine learning algorithms and data analytics
- Developed interactive dashboards and visualization modules for property trend analysis
- Implemented predictive modeling workflows and data preprocessing pipelines
- Designed user-friendly interfaces using Streamlit for real-time prediction analysis

2.Employee Performance Prediction System

Tech Stack: Python, Machine Learning, Power BI

- Developed a KPI-based analytics framework for workforce productivity analysis
- Performed data preprocessing, visualization, and predictive modeling workflows
- Created analytical dashboards for performance reporting and business insights

3.Retail Sales Forecasting & Inventory Optimization

Tech Stack: Python, SQL, Power BI

- Built forecasting workflows for demand prediction and inventory optimization
- Analyzed structured sales datasets using Python and SQL-based analytics techniques
- Created dashboards for business reporting and sales trend visualization

4.Student Performance Prediction System

Tech Stack: Python, Machine Learning, Pandas

- Built an ML-based prediction system using feature engineering and classification techniques
- Performed model evaluation and data preprocessing for academic performance analysis

- Developed analytical workflows for prediction-based educational insights

5. Social Media Sentiment Analysis Dashboard

Tech Stack: Python, NLP, Power BI

- Designed an NLP-oriented sentiment analysis dashboard for public opinion tracking
- Processed and analyzed textual datasets using sentiment analysis techniques
- Created visualization dashboards for engagement and trend analysis

6. AI-powered Predictive Maintenance System

Tech Stack: Python, AI, IoT Concepts

- Developed anomaly detection workflows for equipment failure prediction
- Built AI-enabled predictive analysis models using structured industrial datasets
- Worked on predictive maintenance concepts and operational monitoring approaches

7. AI-powered Cybersecurity Threat Detection

Tech Stack: Python, Machine Learning

- Built ML-based suspicious activity classification workflows for cybersecurity analytics
- Analyzed risk patterns and anomaly detection concepts using structured datasets
- Developed AI-based monitoring approaches for security threat identification

ACHIEVEMENTS & RECOGNITION

- Internship Achievement Award — EDC IIT Delhi & Indian Institute of Placement
- AIpreneur Recognition Award — For AI-driven initiative and entrepreneurial learning exposure
- Client Achievement Recognition — Appreciated for professional communication and project contribution during AIpreneur Program
- Diploma Excellence Recognition Award — AI Career Summit, IIT Delhi
- Certificate of Recognition — India's Biggest Job Hunt & Salary Hike Drive
- Awarded Certificate for AI Impact Summit Opportunity Session
- Excellence in Teamwork & Communication — Professional Mastery Recognition Program

SOFT SKILLS

- Communication & Presentation Skills
- Team Collaboration
- Analytical Thinking
- Problem Solving
- Time Management
- Adaptability & Learning Agility
