PROFESSIONAL SUMMARY

Motivated and detail-oriented aspiring AI & Data Science enthusiast with hands-on exposure to multiple academic and project-based applications in machine learning, forecasting, and data analytics. Familiar with Python, Excel, and visualization tools like Power BI and Tableau. Passionate about applying data-driven solutions to solve real-world business problems. Seeking an internship opportunity at HCL Tech to contribute to AI and analytics projects while strengthening technical expertise.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence and Data Science

A.J. Institute of Engineering and Technology

CGPA: 7.71

Higher Secondary (12th Standard)

Govt. PU College for Girls, Balmatta

Percentage: 90%

Secondary School (10th Standard)

St Ann's high School

Percentage: 86%

SKILLS

- Programming: Python (Basic), SQL (Basic)
- Data Tools: Excel, Power BI, Tableau
- Concepts: Machine Learning, Data Analysis, Data Visualization, Forecasting, NLP basics
- Tools: Jupyter Notebook, Git, GitHub, VS Code

SOFT SKILLS

- Communication & Presentation Skills
- Team Collaboration
- Analytical Thinking
- Problem Solving

- Time Management
- Adaptability & Learning Agility

PROFESSIONAL COURSES AND CERTIFICATIONS

- Career Essentials in Generative AI (Microsoft & LinkedIn) — basic understanding of generative AI and prompt design
- Entrepreneurship Learning Pathway (LinkedIn) — introductory knowledge of business models and problem-solving
- Data Science & Analytics (HP LIFE) — fundamentals of data analysis and interpretation
- AI for Beginners (HP LIFE) — introductory knowledge of AI concepts
- Sales Forecasting (HP LIFE) — basic understanding of forecasting techniques
- Presenting Data (HP LIFE) — familiarity with data visualization and communication
- Agile Project Management (HP LIFE) — understanding of agile principles and workflows
- Design Thinking (HP LIFE) — exposure to structured problem-solving approaches
- Basics of Finance (HP LIFE) — foundational financial concepts
- Digital Business Skills (HP LIFE) — awareness of digital tools in business
- Effective Leadership (HP LIFE) — basics of teamwork and leadership
- Effective Presentation Skills (HP LIFE) — structured communication skills
- Introduction to Cybersecurity Awareness (HP LIFE) — basic security awareness

PROJECTS

- **AI Autonomous Navigation System:** Developed an AI-based navigation system with obstacle detection and route optimization using Machine Learning and Python.
- **Retail Forecasting System:** Built a sales forecasting model to predict retail demand and analyze inventory trends using Time Series Analysis.
- **AI Energy Consumption Forecasting:** Designed a predictive analytics system to forecast energy consumption patterns using Machine Learning techniques.
- **AI Medical Image Analysis:** Developed a computer vision-based medical image classification system using Deep Learning techniques.
- **AI Cybersecurity Threat Detection System:** Created an AI-powered anomaly detection system to identify suspicious network activities and potential threats.
- **AI Predictive Maintenance IoT System:** Built a predictive maintenance solution using IoT sensor data and Machine Learning models to detect equipment failures.
- **Personal Expense Analytics Dashboard (Freelancer Project):** Designed an expense tracking and analytics

dashboard for monitoring income, expenditure, and budgeting insights.

- **Weather Forecasting & Alert System:** Developed a real-time weather forecasting application using APIs with data visualization and alert mechanisms.
- **Stock Market Data Analyzer:** Built a stock market analytics platform for tracking price trends, movements, and financial insights.
- **Customer Churn Prediction System:** Developed a machine learning model to predict customer churn and support retention strategy optimization.
- **House Price Prediction System:** Created a regression-based ML model to estimate house prices using property features and market data.
- **Student Performance Prediction System:** Built a predictive analytics system to forecast student academic performance using machine learning algorithms.
- **Credit Card Fraud Detection System:** Developed an AI-based fraud detection model to identify suspicious and anomalous financial transactions.
- **Social Media Sentiment Analysis Dashboard:** Built an NLP-based sentiment analysis dashboard to classify and visualize social media opinions and trends.
- **Poll Results Visualization System:** Designed an interactive analytics system to visualize survey and poll results using charts and dashboards.
- **Multi-User Expense Tracker System:** Developed a multi-user financial tracking application with budgeting, expense categorization, and analytics features.
- **Employee Performance Prediction System:** Built a machine learning model to analyze and predict employee performance trends for HR analytics.
- **Climate Trend Analyzer:** Developed a data visualization system to analyse climate patterns and environmental trends using historical data.

ACHIEVEMENTS & RECOGNITION

- Awarded Certificate of Recognition from EDC–IIT Delhi
- Awarded Certificate for Diploma Participation from EDC–IIT Delhi
- Awarded Certificate for Internship from EDC–IIT Delhi
- Successfully completed the Postman Classroom Program conducted by NITK Surathkal in collaboration with Postman (Dec 2024)
